

## Table of Contents

### South Arkansas River Watershed Assessment

<b><u>Section</u></b>	<b><u>Topic</u></b>	<b><u>Pages</u></b>
	Executive Summary	i-vi
	Table of Contents	vii-xii
<b>1.0</b>	Introduction to the South Arkansas River Watershed	1-4
<b>2.0</b>	Watershed Assessment and Stream Ecology	5-16
<b>3.0</b>	History, Development, and Land Use	17-28
<b>4.0</b>	Geology, Topography, and Soils	29-34
<b>5.0</b>	Climate and Precipitation	35-38
<b>6.0</b>	Hydrology and Flow Regime	39-50
<b>7.0</b>	Vegetation	51-68
<b>8.0</b>	Wildlife, Fish, and Aquatic Invertebrates	69-84
<b>9.0</b>	Water Quality	85-94
<b>10.0</b>	Channel and Floodplain Processes	95-106
<b>11.0</b>	Establishing Watershed and Riparian Restoration Goals	107-116
<b>12.0</b>	Data Gaps and Information Needs	117-118
	Literature Cited	119-136

### **Appendices**

<b>A</b>	Aerial Photographs of South Arkansas River Project Corridor
<b>B</b>	Significant Wildlife Habitat in the South Arkansas River Watershed and Corridor
<b>C</b>	Riparian Vegetation Transects
<b>D</b>	Potential Barriers to Fish Movement in the South Arkansas River Project Corridor
<b>E</b>	Water Quality Sampling Protocols and Results
<b>F</b>	Stream Profile and Substrate Data

## List of Figures

<b><u>Figure</u></b>	<b><u>Title</u></b>	<b><u>Page</u></b>
<b>Section 1.0, Characteristics of South Arkansas River Watershed</b>		
1-1	Location of South Arkansas River watershed	1
1-2	Location of the South Arkansas River project corridor	2
1-3	Non-consumptive use values in the South Arkansas River watershed	4
<b>Section 2.0, Watershed Assessment and Stream Ecology</b>		
2-1	Location of South Arkansas River watershed within the Arkansas River basin	6
2-2	Complexity of streams and streamside habitat are critical to stream ecosystem functions and values	9
2-3	Connectivity and width are important components of stream corridors	10
2-4	Diagram of foundation of aquatic food chain in headwater streams	13
<b>Section 3.0, History, Development, and Land Use</b>		
3-1	Camphouse at Arbourville, ca. 1880	18
3-2	D&RG Railroad near Garfield, ca. 1880	18
3-3	Monarch Mine, 1884	18
3-4	Monarch mine and quarry, 2012	19
3-5	Historic mine locations in South Arkansas River watershed	19
3-6	Land ownership in South Arkansas River watershed and project corridor	21
3-7	South Arkansas River, 2012	25
3-8	South Arkansas River, 2012	25
3-9	South Arkansas River, 2013	25
<b>Section 4.0, Geology, Topography, and Soils</b>		
4-1	Surface geology of the South Arkansas River project corridor	30
4-2	Location of major soils associations in the South Arkansas River project corridor	32
4-3	Rough broken land-Badland soil association in the South Arkansas River project corridor	32
4-4	Loss of streamside vegetation increases erosion along the South Arkansas River	
4-5	Excess sediment deposition in the South Arkansas River at CCR 107	33

<b><u>Figure</u></b>	<b><u>Title</u></b>	<b><u>Page</u></b>
<b>Section 5.0, Climate and Precipitation</b>		
5-1	Components of the hydrologic cycle	36
5-2	Precipitation zones in the South Arkansas River watershed	37
<b>Section 6.0, Hydrology and Flow Regime</b>		
6-1	Components of the hydrologic cycle	40
6-2	Water finds its way to the river by several paths	40
6-3	The four dimensions of stream hydrology	42
6-4	Location of the South Arkansas River watershed	44
6-5	Hydrograph of the South Arkansas River	45
6-6	Groundwater flows in the South Arkansas River watershed	46
6-7	In-stream flow decrees in the South Arkansas River watershed	47
6-8	Location of decreed groundwater wells in the South Arkansas River watershed	48
6-9	Excess sediment deposition in the South Arkansas River at CCR 107	49
<b>Section 7.0, Vegetation</b>		
7-1	Native plant communities in the South Arkansas River watershed	52
7-2	Locations of major wetland areas in the South Arkansas River project corridor	56
7-3	Locations of riparian vegetation transects in the South Arkansas River project corridor	57
7-4	Potential conservation areas in the South Arkansas River watershed	58
7-5	Canada thistle	62
7-6	Russian olive	62
7-7	Teasel	62
7-8	Common mullein	62
7-9	Cheatgrass	63
7-10	Russian thistle	63
7-11	Kochia	64
7-12	Thistle/kochia infestation west of CCR 210	64
7-13	Thistle/kochia accumulation at water diversion structure	64
7-14	Development encroachment into streamside areas	65
7-15	Diagram of stepped floodplain redesign	65
7-16	Forest fuel hazard areas in the South Arkansas River watershed	66

<b><u>Figure</u></b>	<b><u>Title</u></b>	<b><u>Page</u></b>
<b>Section 8.0, Wildlife, Fish, and Aquatic Invertebrates</b>		
<b>8-1</b>	BCR 16 (left) and Colorado BHCAs	68
<b>8-2</b>	Important mammal habitat in the South Arkansas River watershed	70
<b>8-3</b>	Complexity of in-stream and streamside habitat are critical to their functions and values	74
<b>8-4</b>	Pond leveler to control water elevation	83
<b>8-5</b>	Wire mesh to prevent blockage of culvert by beaver	83
<b>8-6</b>	Wire mesh to protect existing trees from beaver damage	83
<b>Section 9.0, Water Quality</b>		
<b>9-1</b>	Location of water quality sampling sites on the South Arkansas River	90
<b>9-2</b>	Excess sediments in the South Arkansas River downstream at CCR 107	92
<b>9-3</b>	Stream substrate in the South Arkansas River upstream at CCR 221	92
<b>9-4</b>	Example of bank erosion along the South Arkansas River	92
<b>9-5</b>	Impact of uncontrolled livestock access to the South Arkansas River	92
<b>9-6</b>	Slope erosion from parking lot down to the South Arkansas River	93
<b>9-7</b>	Existing outfalls are often difficult and costly to address	93
<b>9-8</b>	Lack of appropriate erosion control during construction	93
<b>Section 10.0, Channel and Floodplain Processes</b>		
<b>10-1</b>	Depiction of interplay between stream flow, sediment supply, and slope	96
<b>10-2</b>	Disturbance is often transmitted downstream	96
<b>10-3</b>	Channel evaluation sites in South Arkansas River project corridor	99
<b>10-4</b>	Channel types in the Rosgen classification system	100
<b>10-5</b>	South Arkansas River, 2012	101
<b>10-6</b>	South Arkansas River, 2013	102
<b>10-7</b>	South Arkansas River, 2013	102
<b>10-8</b>	South Arkansas River, 2012	102
<b>10-9</b>	South Arkansas River, 2012	102
<b>10-10a</b>	Flows causing bank erosion	103
<b>10-10b</b>	Log veins redirect flows	103
<b>10-11</b>	Diagram of stepped floodplain redesign	104

## List of Tables

<b><u>Table</u></b>	<b><u>Title</u></b>	<b><u>Page</u></b>
<b>Section 2.0, Watershed Assessment and Stream Ecology</b>		
2-1	Riparian Buffer Requirements for Selected Riparian Functions	11
<b>Section 3.0, History, Development, and Land Use</b>		
3-1	Population Estimates for Chaffee County, Salida, and Poncha Springs, between 2000 and 2011	20
<b>Section 6.0, Hydrology and Flow Regime</b>		
6-1	South Arkansas River Tributary Drainage Areas	41
<b>Section 7.0, Vegetation</b>		
7-1	Potential Conservation Areas in the South Arkansas River Watershed	59
<b>Section 8.0, Wildlife, Fish, and Aquatic Invertebrates</b>		
8-1	Comparison of 2004 Trout Surveys in the South Arkansas River	79
8-2	Results of Aquatic Invertebrate Sampling in the South Arkansas River	81
<b>Section 9.0, Water Quality</b>		
9-1	Selected Water Quality Parameters in the South Arkansas River	91
<b>Section 10.0, Channel and Floodplain Processes</b>		
10-1	Summary of Reach Analysis of the South Arkansas River	99
10-2	Comparison of Stream Type Characteristics—Disturbance and Recovery	100
10-3	Summary of Changes in Stream Flow, Sediment Supply, and Slope Observed in the South Arkansas River Project Corridor	101
